PROJECT

The Project in this Programme is to be done in the III & IV Semesters with a total credit of 4 including Project Viva. The work load of the Project is 5 hours each in III & IV Semesters. The Project Report (Dissertation) should be self contained. It should contain an introduction, necessary background and a reference list in addition to the main content. The main content may be of length not less than 30 pages in the A4 format with one and half line spacing.

Project Viva is to be conducted by a board consisting of one external and one internal (preferably the supervisor of the project) examiners and equal weightage must be given to the dissertation and the presentation of the student and half of that may be given to the viva. There must be a 20 minute presentation by the student followed by 10 minutes viva.

Evaluation and Grading

The evaluation scheme for each course shall contain two parts.

(a) Internal Evaluation – 25% Weightage

(b) External Evaluation – 75% Weightage

Both Internal and External evaluation shall be carried out using direct grading system as per the general guidelines.

In the case of the Elective Course MT4E07: Computer Oriented Numerical Analysis, the external examination will consist of a written examination and a practical examination each of duration one and half hours. Each will carry a weightage of 18. Thus the total weightage is 36 as in the case of other courses. The details are appended to the syllabus of the course.

Question Paper Pattern for the written examination of the Elective Course: MT4E07 Computer Oriented Numerical Analysis

For the Elective Course MT4E07: Computer Oriented Numerical Analysis there will be a Theory written examination and a practical examination each of duration one and half hours. The valuation will be done by Direct Grading System. The question paper for the written examination will consists of 6 short answer questions, each of weightage 1, 6 paragraph type questions each of weightage 2 and 2 essay type questions, each of weightage 4. All short answer questions are to be answered while 4 paragraph type questions and 1 essay type questions are to be answered with a total weightage of 18. The questions are to be evenly distributed over the entire syllabus.

Question Paper Pattern for the written examinations of all other courses

For each course there will be an external examination of 3 hours duration. The valuation will be done by Direct Grading System. Each question paper will consists of 14 short answer questions, each of weightage 1, 10 paragraph type questions each of weightage 2 and 4 essay type questions, each of weightage 4. All short answer questions are to be answered while 7 paragraph type questions and 2 essay type questions are to be answered with a total weightage of 36. The questions are to be evenly distributed over the entire syllabus.

MT1V06 & MT3V16 Viva Voce Examinations

Viva Voce in the FIRST and THIRD semesters are to be conducted in the presence of two external examiners. These viva voce must be based on the papers in the respective semesters. In the viva voce all the papers in that semester must be covered and each paper must have a minimum of 5 minutes duration.

PATTERN OF EXAMINATION

The External examination will consist of a written paper and a practical examination of one and half hours duration each. Both the written and the practical examinations carry a weightage of 18 each, making the total weightage 36 as in the case of other courses. The valuation will be done by the proposed grading/marking system. The question paper for the written examination will consist of 6 short answer questions, each of weightage 1, 6 paragraph type questions each of weightage 2 and 2 essay type questions, each of weightage 4. All short answer questions are to be answered while 4 paragraph type questions and 1 essay type questions are to be answered with a total weightage of 18. The questions are to be evenly distributed over the entire syllabus giving equal weightage to methods and programming. A candidate appearing for the practical examination should submit his/her record to the examiners. The candidate is to choose two problems from part A and three problems from part B by lot. Let him/her do any one of the problems got selected from each section on a computer. The examiners have to give data to check the program and verify the result. A print out of the two programs along with the solutions as obtained from the computer should be submitted by the candidate to the examiners. These print outs are to be treated as the answer sheets of the practical examination. The part A of the practical examination will carry a weightage of 6, Part B a weightage of 9 and the practical record carries a weightage 3.

Procedure for conducting the Practical Examination

Those colleges offering CONA should inform the Controller of examinations, University of Calicut, well in advance of the number of candidates likely to appear for the practical examination at their college. They should also indicate the number of batches required for completing the practical examination on the basis that only two candidates are to do practical on one computer a day. In case, due to some technical problems like power failure or system break down, practical could not be conducted on the specified day, the examiners can choose an alternate day to conduct the examination in fresh. But the matter along with the new dates for the conduct of examination at the centre should be brought to the notice of the Controller of Examinations.
